

Citrus Variety Fact Sheet

1

'OLL-DC-3-40'

'OLL-DC-3-40' is a sweet orange selection that produces round oranges with internal and external color similar to that of 'Rhode Red Valencia'. It was selected as one of two clones showing better HLB tolerance than the already tolerant parental clone 'OLL-8'. 3.5 year old trees with HLB have produced fruit with up to 11.5 brix. 'OLL-DC-3-40' trees grow faster and larger than trees of 'Valencia'. 'OLL-DC-3-40' appears to be slightly more vigorous than 'OLL-DC-3-36'.

VARIETY SNAPSHOT	
CATEGORY	CHARACTERISTICS
Key Attributes	<ul style="list-style-type: none">• Improved Brix, color, and juice quality even when infected with HLB• High tolerance to citrus greening• Better flavor than 'Valencia'
Brix Rating	9.5 to 11.5 from trees with HLB, expect to be higher if no HLB
Fruit Size	Medium, size similar to that of 'OLL-8'
Harvest	'OLL-DC-3-40' is a late season orange (harvest March through May)
Tree Characteristics	Trees of 'OLL-DC-3-40' exhibit improved HLB tolerance and grow faster and larger than trees of 'Valencia'
Yield	No formal yield data, but cropping has been observed to be higher than standard 'Valencia' and comparable to 'OLL-8'
IP Status	U.S. PPAF
